PROFESSIONAL SUMMARY

IT graduate with a strong foundation in Python, SQL, Power BI, and MS Excel, passionate about turning raw data into meaningful insights. Skilled in data cleaning, dashboard building, and statistical analysis to support data-driven decision-making. Looking to grow as an entry-level Data Analyst in a data-focused organization.

EXPERIENCE

Data Analyst Trainee

2026

C Cube Technologies - Karaikudi

Completed a 6-month training program covering Python (Pandas, NumPy), SQL, Power BI, and MS Excel with hands-on experience in data cleaning, ETL pipelines, and KPI dashboard building. Applied statistical analysis, exploratory data analysis (EDA), and data mining techniques through real-world dataset assignments and project-based learning.

SKILLS

Python

- Proficient in core Python concepts including functions, loops, conditional statements, and object-oriented programming (OOP).

SQL

- Hands-on knowledge of DDL, DML, DCL, DQL, and TCL commands with strong understanding of relational database concepts.
- Designed and optimized 10+ queries using JOINS, subqueries, and aggregation functions to support real-time data filtering and reporting.

MS Excel (Advanced)

- Built an interactive sales dashboard analyzing 5,001+ records using Pivot Tables, Pivot Charts, Slicers, and 6 dynamic KPI cards.
- Applied advanced Excel functions and conditional formatting to generate business reports supporting data-driven decision-making.

Power BI

- Beginner-level experience in data importing, basic report creation, and building interactive dashboards and KPI visualizations during training at C Cube Technologies.

PROJECT

Mobile & Laptop Sales Dashboard

MS Excel | Pivot Tables | Pivot Charts | Slicers | KPI Cards

- Engineered an Excel dashboard analyzing 5,001+ sales records across 3 categories and 5 regions, cutting manual reporting effort by 60%.
- Built 6 KPI cards and 4 Pivot Charts with Slicer-based filtering, identifying top 2 product lines driving 43% of total revenue and flagging 2 underperforming regions.

Blood Group Detection Using Fingerprint

Python | OpenCV | Flask | SIFT | Image Processing

- Automated fingerprint matching using SIFT and BFMatcher across 40+ samples, achieving consistent blood group prediction with zero manual intervention.
- Delivered a Flask web application generating structured PDF reports in under 5 seconds, replacing a fully manual identification process.

Job Portal Web Application

HTML | CSS | JavaScript | SQL | Python

- Built a job portal supporting multi-keyword and skill-based search across 100+ listings, reducing irrelevant search results by 40% through optimized SQL filtering.
- Designed 10+ SQL queries with JOINS and WHERE clauses for real-time filtering and a responsive front-end for seamless navigation.

EDUCATION

Bachelor of Information Technology	2022 - 2026
Coimbatore Institute of Engineering and Technology [7.41]	
Higher Secondary Certificate (HSC)	2021 - 2022
Infant Jesus Matric Higher Secondary School [73.5%]	
Secondary School Leaving Certificate (SSLC)	2019 - 2020
Infant Jesus Matric Higher Secondary School [83.2%]
