PROFESSIONAL SUMMARY

Results-driven and analytically minded IT graduate with a strong foundation in data analysis, statistical thinking, and business intelligence. Equipped with practical skills in Python, SQL, Power BI, and MS Excel to transform raw data into meaningful insights that support strategic decision-making. Adept at identifying trends, building dashboards, and communicating data-driven findings clearly to both technical and non-technical audiences. Eager to contribute as an entry-level Data Analyst and grow within a data-focused organization.

TRAINING EXPERIENCE

Data Analyst Trainee

2026

C Cube Technologies - Karaikudi

Underwent a structured 6-month professional training program with dedicated focus on the complete data analysis lifecycle — from raw data ingestion to insight delivery. Gained hands-on experience handling real-world datasets using Python libraries such as Pandas and NumPy for data manipulation, and Matplotlib and Seaborn for visual storytelling. Developed proficiency in writing optimized SQL queries to retrieve, filter, and aggregate data from relational databases. Practiced building dynamic reports and KPI dashboards using Power BI and Advanced MS Excel including Pivot Tables, Slicers, and conditional formatting. Strengthened understanding of ETL pipelines, exploratory data analysis, data mining, and foundational machine learning concepts through practical assignments and project-based learning.

PROJECT EXPERIENCE

Mobile & Laptop Sales Dashboard

2026

MS Excel | Pivot Tables | Pivot Charts | Slicers | KPI Cards

- Engineered an interactive Excel dashboard analyzing 5,001+ sales records across 3 product categories and 5 regions, cutting manual reporting effort by 60%.
- Identified top 2 product lines driving 43% of total revenue and flagged 2 underperforming regions with a 28% sales gap vs average.
- Built 6 dynamic KPI cards and 4 Pivot Charts with Slicer-based filtering, enabling drill-down analysis across time, region, and product in under 3 clicks.

Blood Group Detection Using Fingerprint

2025

Python | OpenCV | Flask | SIFT | Image Processing

- Automated fingerprint matching using SIFT and BFMatcher across a dataset of 40+ fingerprint samples, achieving consistent blood group prediction with zero manual intervention.
- Delivered a Flask web application that generates structured PDF reports in under 5 seconds per query, replacing a fully manual identification process.
- Engineered an end-to-end image processing pipeline from fingerprint upload to blood group report generation using Python and OpenCV.

IoT-Based Adaptive Traffic Management System (Prototype)

2026

Arduino Mega | IP Sensors | IoT | Embedded Systems

- Monitored real-time vehicle density across 4 intersection lanes using 9 IP sensors, dynamically adjusting signal timing across 3 traffic threshold levels.
- Validated prototype performance in a simulated 4-lane intersection, demonstrating a 35% reduction in average vehicle wait time compared to fixed-timer systems.
- Presented findings as a research paper at CIETM-2026, highlighting IoT applications in smart city and intelligent transportation systems.

SKILLS

Languages:

- Python
- SQL

Databases:

- SQL
- Relational Database Design
- Query Optimization

Web:

- HTML
- CSS

Tools:

- MS Excel (Advanced)
- Power BI
- OpenCV

CERTIFICATIONS

- Data Analyst Program – C Cube Technologies (Expected Completion: 2026)
- Web Development Program – C Cube Technologies (Expected Completion: 2026)
- Research Paper Presentation – IoT-Based Adaptive Traffic Management System CIETM-2026

EDUCATION

Bachelor of Information Technology

2022 - 2026

Coimbatore Institute of Engineering and Technology

CGPA: 7.41
